INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.
PCT/US03/33964**V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****1. STATEMENT**

Novelty (N)	Claims <u>1-4</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-4</u>	NO
Industrial Applicability (IA)	Claims <u>1-4</u>	YES
	Claims <u>NONE</u>	NO

2. CITATIONS AND EXPLANATIONS

Claims 1-4 lack an inventive step under PCT Article 33(3) as being obvious over Smithkline Beecham (WO'442). The WO publication describes similar compounds having the same uses as claimed herein. See pages 1-4 and in particular piperazino species listed on page 10, lines 20-21. Said species differs only in presence of 2 chlorines on phenyl ring in place of instant 2-chloro-3-fluorophenyl derivative in claims 1-4. Note that the WO reference teaches all halos as suitable substituents on the phenyl ring as can be seen from the definition of Y on page 4. Thus it would have been obvious to replace either chloro with fluorine and in so doing obtain a compound within the instant scope for uses described by WO'442.

Claims 1-4 meet the criteria set out in PCT Article 33(4), and thus possess industrial applicability because the subject matter claimed can be made or used in industry. Compounds are described for a variety of uses based on their activity as IL-8 receptor antagonists.
